

GENEVA GOVCON AT A GLANCE

Who We Are

For over 30 years, Geneva has delivered mission-driven support for military medical research as a trusted nonprofit partner by government, industry, and academia. We bring deep expertise in clinical trial management, program execution, staffing, and acquisition. Our expertise ensures rapid, effective execution of research that strengthens military readiness and delivers solutions across defense and civilian health systems.

Technical Capabilities

Program & Project Management

Delivers compliant, cost-effective, and mission-aligned R&D programs across federal agencies.

Acquisition & Contracting Support

Navigates federal procurement with precision, ensuring compliance, efficiency, and successful award execution.

Regulatory Affairs & Compliance Management

Ensures regulatory compliance through our dedicated in-house experts, accelerating study startup, and maintaining program performance.

Staffing Solutions

Deploys a global workforce of 400+ to support military medical research through rapid, mission-aligned staffing, including via GSA Multiple Award Schedule (47QRAA21D009K).

Research Operations & Data Management

Leverages direct access to DoD databases and secure infrastructure to enable compliant data capture, efficient reporting, and streamlined execution.

Procurement & Travel Compliance

Manages complex purchasing and travel requirements to ensure full compliance with federal regulations.

Technical & Scientific Support

Provides clinical, scientific, and technical experts who deliver innovative products and programs.

Why Geneva

- **Nonprofit Advantage:** As a 501(c)(3) nonprofit, Geneva offers flexibility and reduces real and perceived conflicts of interest with the federal government.
- **Strategic Partnerships:** Collaborations with academia, industry, and government entities to catalyze scientific and technical innovation through multidisciplinary partnerships.
- **Global Reach:** Support for over 320 research programs at more than 50 military treatment facilities and federal laboratories worldwide.
- **Proven Track Record:** Management of \$422+ million in federal and non-federal funds in support of military research and education since inception.

Our Industry Alliances
