

## RESEARCH

FLRI and The Geneva Foundation are honored to be founding members of the North Carolina Center for Optimizing Military Performance (NC-COMP). NC-COMP is comprised of more than 90 North Carolina-based academic, industry, nonprofit, and state government organizations, in collaboration with the DoD operational units and funding agencies. NC-COMP is focused on delivering world-class human performance solutions to the DoD.

Geneva's past and current human performance research includes:

- Readiness
- Injury Prevention & Rehab
- TBI & PTSD
- Nutrition
- Women's Health
- Education & Training
- Telehealth
- Biotechnology Solutions
- Wearable Devices
- Cognitive Performance
- Sleep
- Soldier/SOF for Life

62 Ongoing Studies

\$134M Current Funding

120 Collaborators

# SOLDIER-TESTED SOLUTIONS

## Fort Liberty Research Institute

Program Mission: To optimize military human performance through scientific innovation and enduring partnerships with military commands, research investigators, and their collaborators.

### Providing Soldier approved solutions

FLRI takes research out of the clinic, operationalizing it in partnership with the Warfighter.

The Fort Liberty Research Institute (FLRI) is dedicated to research supporting the capability of the warfighter in areas including human performance, sustainment, traumatic brain injury, and the female Warfighter.

FLRI was formed in 2018 as a collaborative effort between Womack Army Medical Center, Fort Liberty, and The Geneva Foundation. Capitalizing on the combined strength of those organizations along with local, regional, and state partners, the FLRI provides world-class research support focused on the operational needs of the Warfighter.

The institute works to ensure that warfighting units' validated gaps and requirements are vigorously and comprehensively addressed by the scientific community.

WARFIGHTER CENTRIC  
DATA DRIVEN

OVERMATCH

KEEPING COMMANDERS INFORMED,  
REDUCING REDUNDANCY,  
PROTECTING INVESTMENTS, AND  
ENHANCING READINESS.

### Why work with FLRI

FLRI keeps Commanders informed about research efforts across their installation and across the services, helping to reduce redundant efforts and ensuring that research funds are invested wisely.

### ENHANCING READINESS

#### FLRI's Unique Approach

With Geneva at its side, FLRI manages complex research programs that involve human performance. FLRI serves as a partner alongside researchers, their teams, and collaborators ensuring that Commanders of the most elite military units in the world receive the knowledge and technical products they need.

#### STRATEGIC OUTREACH

Provide strategic direction for the types of knowledge and products required to support Warfighters.

#### PROGRAM GROWTH

Connect ongoing human performance research programs, such as MIRROR and 4D Bio3, and manage funding efforts to support additional donor-funded research.

#### PROGRAM OPERATIONS

Manage and coordinate human performance research and related activities on behalf of Commanders.

#### PROJECT DELIVERY

Leverage existing relationships with federal agencies, industry, academia, and other nonprofit institutions to connect Commanders to world class researchers and research resources.

# LEADERSHIP

## About Us

The Geneva Foundation, a 501(c)3 non-profit organization, is a dynamic accelerator of scientific innovation and a steadfast partner in conducting human performance research since 1993. Today, Geneva supports over 370 research programs at over 50 military treatment facilities and federal laboratories worldwide.

FLRI's veteran-led staff is local to Fayetteville and Fort Liberty. Our team of veterans and military spouses is proud to continue serving and supporting our nation's warfighters!
