The Geneva Foundation delivers operationally relevant, military-unique research aligned with DoD and federal agency requirements, ensuring mission success. We accelerate research and development to deliver deployable solutions that enhance the health, readiness, and capabilities of our armed forces and the communities they serve. Geneva provides contracting partners with diverse collaborative opportunities to effectively pursue and fulfill the distinct needs of government customers. We understand the intricate landscape of government contracting and leverage our expertise to generate winning proposals and deliver successful outcomes.

WHY Geneva

- 30+ years advancing complex research programs within military and civilian medical enterprises
- Direct engagement and consultation with military commands
- Expertise in the development and dissemination of knowledge products & emerging technologies
- Facilitation of tech transfer & commercialization of deployable solutions
- Experience in fostering multidisciplinary partnerships within industry, academia, & government sectors
- Proven track record of efficient recruitment and staffing of high-quality personnel to meet the government customer's mission and requirements
