

# RESEARCH & DEVELOPMENT

The Geneva Foundation drives operationally relevant, military-unique research aligned with DoD requirements, ensuring mission success. We accelerate medical research and development to deliver deployable solutions that enhance the health, readiness, and capabilities of service members and the communities they serve. Our approach ensures successful research outcomes by fostering multidisciplinary collaborations, executing tailored program and award management, and facilitating pathways to commercialization. With over 30 years of experience, Geneva is invested as a strategic partner to sustain and advance military medicine.

## RESEARCH SOLUTIONS

### RESEARCH OPERATIONS

**Proposal Development:** Geneva actively identifies funding opportunities, develops compliant proposal templates, and executes strategies that enhance proposal competitiveness. Pre-award support is provided at no cost to investigators and research teams.

**Award Management:** Geneva accelerates research by offering customer-centric award management tailored to project needs and goals.

**Program Management:** Geneva has extensive experience managing sponsored research projects worldwide, including grants, contracts, cooperative agreements, clinical trials, congressional special interest programs, and multi-center research consortiums.

**Administrative Services:** Geneva delivers robust administrative solutions including travel purchasing, reserve fund management, recruitment, and staffing.

### REGULATORY AFFAIRS

Geneva's expertise includes navigating DoD and DHA regulations, ensuring FDA compliance, managing all aspects of regulatory submissions, and reporting throughout the project lifecycle. Our experts proactively identify challenges, manage risks, and engage with regulatory authorities as needed.

# WHY GENEVA

Extensive experience navigating the unique complexities of the military health system, including regulatory, contractual, financial, and compliance aspects

Adept at supporting a vast network of military performance sites worldwide, including military treatment facilities, federal laboratories, and defense health networks

Direct engagement and consultation with military commands, DoD, and DHA leadership

Access to subject matter experts with diverse expertise, assets, and resources

Top Secret Level federal security clearance

Extensive multidisciplinary partner networks within and outside of the DoD

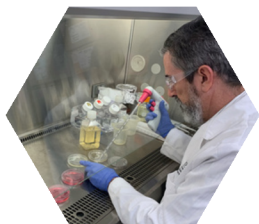

Robust data management and analysis capabilities

Expertise in facilitating pathways to commercialization of deployable solutions

## PROGRAM DEVELOPMENT & MANAGEMENT

Geneva has a proven track record of building and growing comprehensive research programs that address the needs of the warfighter, the DoD, and the larger medical community. We build multidisciplinary networks between research teams and academia, government, and industry stakeholders to ensure program success and sustainability.

## COMMERCIALIZATION

Geneva facilitates pathways to commercialization, transforming research into practical solutions, spanning proof-of-concept studies, therapeutic interventions, diagnostic tools, medical devices, and drug delivery systems within military and civilian sectors. Geneva connects industry, academia, government, and non-profit stakeholders to foster cross-functional collaboration, overcome challenges, and drive innovation.

## RESEARCH DISSEMINATION

Geneva maximizes the impact of research by tailoring dissemination efforts to amplify complex findings across both military and civilian health sectors. We customize our approach to meet the specific needs of each project, ensuring that critical research effectively engages stakeholders and impacts real-world outcomes.
